Minor Web Upgrade - app and eNews

Your website has been upgraded to accommodate the new app called 'Updated' and the new email newsletter system called 'eNews'. There will be more information on eNews available at https://www.sponsor-ed.com.au/page/199/Cheat-Sheets
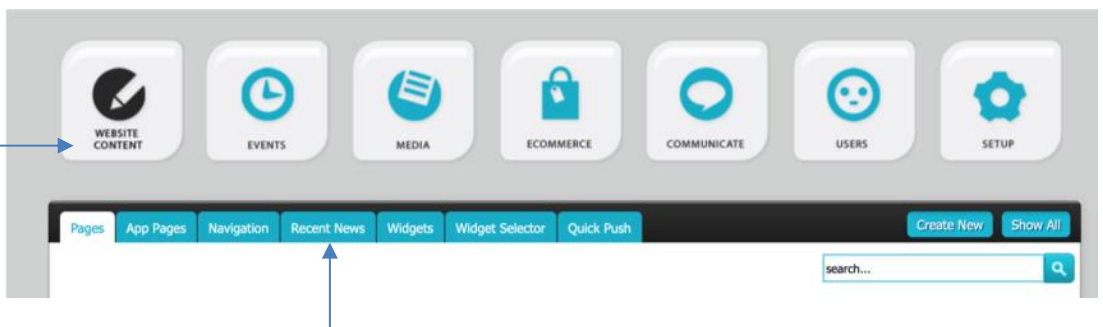

What's Changed with the Website Upgrade?

1. The location of your Recent News has changed.
2. Recent News has changed its name to ARTICLES

NEW LOOK

OLD VERSION

Minor Web Upgrade - app and eNews

In the past, when creating an article for the homepage, you went to Recent News and when done creating the article, you selected 'Save As' Published.

With the new method, go to ARTICLES, create the article as normal, and then select 'Publish to Homepage'. You can still save as Draft as normal.

You can see in the dropdown 2 new publishing categories, Archive and e-News; these are only relevant if you have moved to the new eNews system.

What's changed with the app Updat-ed?
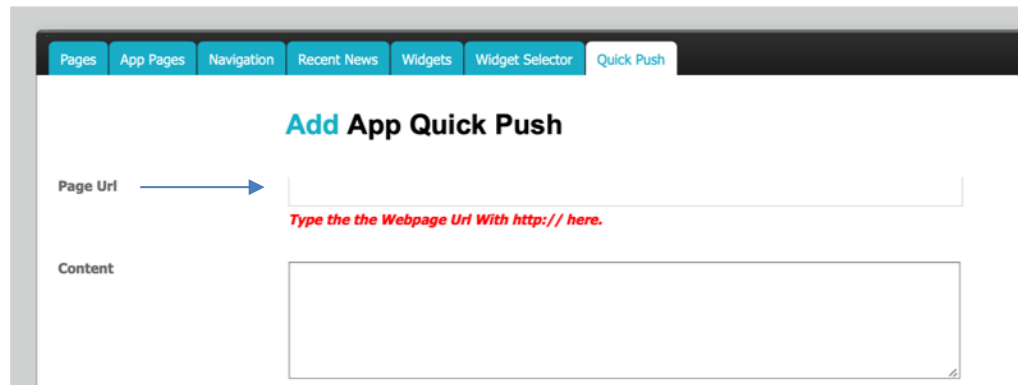

Quick Push now has a Title field.

NEW LOOK

A view of the alert inside the app with the title included, seen below.

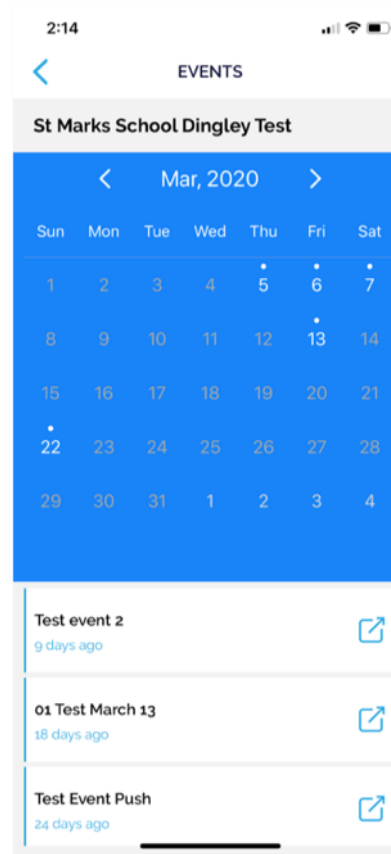

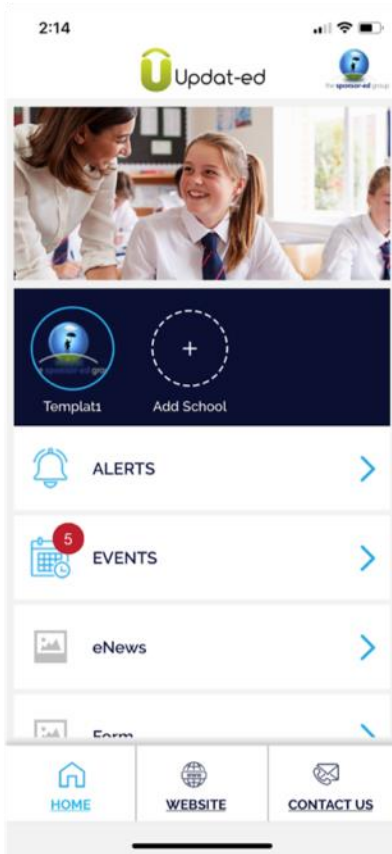

OLD VERSION

The old Quick Push had a Page URL. Now links to internal and external pages can be added in the Content area.
